

ECOSTRUCT
PANEL SYSTEMS

Ecostruct™ manufacturers of the engineered structural insulated panel system.

Ecostruct™ can be used in residential and commercial construction in place of brick, steel or timber.

ECOSTRUCT PANEL SYSTEM ADVANTAGES:

ENGINEERING

Fully compliant to Australian standards.

COST SAVINGS

Build time - Mortgage interest - Rent payments.

REDUCED BUILD TIME

Simple construction method using less trades providing earlier practical completion.

DESIGNED & BUILT TO AUSTRALIAN CONDITIONS

Panels are suited for cyclone rated construction, white ant resistant, fire retardant, recyclable and sustainable.

ENERGY EFFICIENT

You WILL use less power to heat or cool your home, saving you even more money!

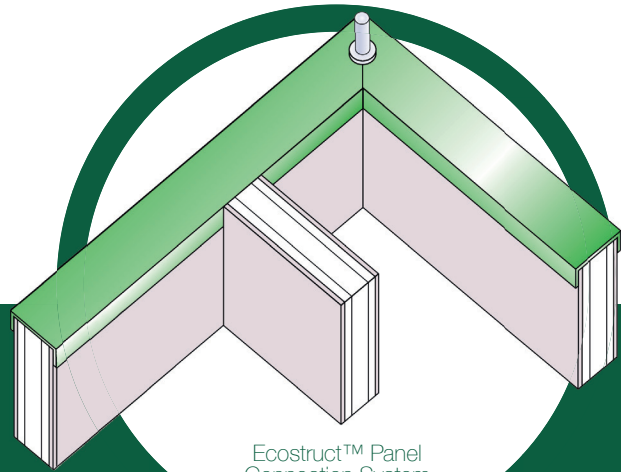

FLEXIBLE DESIGN FEATURES AVAILABLE

Including single and two storey homes, granny flats, extensions, and commercial applications.

4. Final Quote, Client acceptance and Order issued.
5. Manufacture and Deliver Panels.
6. Payment terms agreed direct or through Builder.
7. Builder to complete project
8. Move into your home.

TESTIMONIALS

GO2 Building Solutions Managing Director, Billy Ferreria says *"We are now absolute converts to using Ecostruct wall panels having recently completed six, 3 x 2 Homes in Mundaring in record time, allowing us to be at lock up stage within 18 days. This result is great for our team and more importantly our Clients. GO2 Homes is looking for many more opportunities to use Ecostruct wall panels in WA."*

A major supplier of cladding to Ecostruct Panel Systems is **James Hardie Industries**, *"James Hardie is fully committed to supporting Ecostruct Panel Systems and we are actively encouraging all WA Developers and Builders to consider using the Ecostruct Panels as a real alternative for their housing projects given the many advantages and savings"* says Bill Buxton the Primary Demand Manager, WA.

David Savietto, Managing Director **Future Home Living** says *"We have embraced the use of Ecostruct panels and have established Future Home Living in the WA market to exclusively use this innovative wall panel that will provide a major point of difference, significant time savings and ongoing energy efficiency for our Clients. We see a great future for this alternative form of residential construction and look forward to working with Ecostruct Panel Systems to continue the growth path."*
